Appendix A -- MOTION 12507

A MOTION relating to children's health; adopting policies and a measurement and evaluation plan for a Children's Health Initiative and accepting a report on the health of children in King County, in accordance with the requirements of the 2007 Budget Ordinance, Ordinance 15662, Section 83, Proviso P4.

WHEREAS, King County's mission for the health of the public is to identify and promote the conditions under which all people can live within healthy communities and can achieve optimum health, as adopted in Motion 12475, and

WHEREAS, King County's goal is to protect and improve the health and well-being of all people in King County, as defined by per person healthy years lived, and

WHEREAS, whenever possible, King County will employ strategies, policies and interventions to reduce health disparities across all segments of the population, and

WHEREAS, it is the intent of the county to improve the health of children, and

WHEREAS, significant disparities in children's health by race, ethnicity, region, and income persist in King County and in some cases are growing, and

WHEREAS, research shows that effective policy for ensuring healthy children, resulting in healthy, productive adults, rests on removing barriers that prevent children from achieving consistent access to comprehensive health care, and

WHEREAS, the main barriers children face in receiving consistent access to comprehensive health care are lack of insurance, failure to enroll in an insurance plan and failure to access a consistent source of high quality health care services, and

WHEREAS, Washington State, through enactment of Senate Bill 5093, has expanded health care

Appendix A

Motion 12507

1 insurance coverage to thousands more children and simplified the enrollment process, and

2 WHEREAS, the state intends to provide affordable insurance coverage options for all children by
3 2010, and

4 WHEREAS, fifteen thousand children in King County are uninsured, and

5 WHEREAS, under the expanded state eligibility requirements, approximately nine thousand of the
6 uninsured children in King County will be entitled to state-funded health insurance programs in July 2007,
7 with an additional one thousand children becoming eligible in 2009, and

8 WHEREAS, in 2006, the King County executive demonstrated leadership in addressing children's
9 health by convening the King County Children's Health Access Task Force, comprised of child health
10 experts and advocates, to recommend an approach for assuring children in King County are able to obtain
11 the health care coverage and services they need to achieve optimal health, and

12 WHEREAS, the task force's recommendations included an outreach strategy to enroll children in
13 insurance coverage and link them to a regular source of medical and dental care, and

14 WHEREAS, the task force's recommendations reflect evidence-based best practices that
15 demonstrate a proven ability to provide children with health and dental insurance coverage and access to a
16 usual doctor and a regular dentist, resulting in children receiving the health care services they need when
17 they need them, leading to an increase in healthy years lived, and

18 WHEREAS, the executive, upon recommendation from the task force, developed a proposal
19 addressing children's health for transmittal to the council, and

20 WHEREAS, this motion is the result of a true partnership between a work group made up of
21 council staff, executive office staff and public health staff, and

22 WHEREAS, the executive's proposal and the task force's recommendations are reflected in this
23 motion, which establishes policies for the county's Children's Health Initiative ("CHI"), and

Appendix A

Motion 12507

24 WHEREAS, the CHI is designed to surmount the barriers children face in receiving consistent
25 access to health care services by: assertively locating and enrolling children in public health insurance
26 programs for which they are eligible; disseminating messages about the value of early prevention and
27 insurance in many languages; using trusted messengers from the community to deliver these messages;
28 linking families and children to a regular source of medical and dental care; and encouraging quality
29 integrated service delivery within clinics by utilizing case managers, and

30 WHEREAS, the CHI is a foundational and cost-effective strategy for the county to embark on for
31 improving the health of children because of its holistic approach to the child and because it directly
32 connects children to existing public health insurance programs funded by the state and federal government,
33 and

34 WHEREAS, through the CHI, King County has the opportunity to leverage funding from public
35 and private entities in order to continue to provide leadership by piloting strategies that will build evidence
36 for statewide efforts in areas including, but not limited to, best practices in outreach and linkage, oral health
37 quality improvement and integration, mental health integration pilot programs, and on-line enrollment
38 application, and

39 WHEREAS the measurement and evaluation plans that are part of the CHI will allow the county to
40 assess progress toward meeting the vision, mission and goals of the CHI and build an evidence base for
41 future state public health interventions, and

42 WHEREAS, the CHI is consistent with the adopted Policy Framework for the Health of the Public,
43 and

44 WHEREAS, the CHI is a reasonable and financially sustainable strategy, and

45 WHEREAS, this motion and the attached report on the health of children in King County fulfill
46 requirements of the 2007 Budget Ordinance, Ordinance 15652, Section 83, Proviso P4, as amended;

47 NOW, THEREFORE, BE IT MOVED by the Council of King County:

Appendix A

Motion 12507

48 A. Vision and Mission. The county hereby adopts the following vision and mission statements for
49 the Children's Health Initiative ("CHI"): King County's vision is for every child in King County to achieve
50 optimal health and grow into a healthy adult. Recognizing that regular access to health care is necessary to
51 achieving optimal health, the mission of the county's Children's Health Initiative is to create conditions
52 under which children have consistent access to comprehensive, preventive-focused primary health care,
53 prioritizing those activities which will have the most significant impact on health or reduction in health
54 disparities. Activities shall be based on need and consistent with the adopted Policy Framework for the
55 Health of the Public.

56 B. Program Components. To achieve the vision and mission, the county hereby adopts the
57 following components for the CHI:

58 1. Advocacy for insurance coverage for children. The county will actively advocate at the state and
59 federal level to ensure that children and their families have options for affordable health care coverage;

60 2. Outreach to children. The county shall fund and conduct outreach to enroll children in the
61 state and federal insurance programs for which they are eligible. The county's outreach efforts shall also
62 include ensuring that children receive appropriate preventive-focused primary care once they are enrolled in
63 insurance, through both education and care coordination;

64 3. Health innovation pilot projects. The county will partner with private sector donors on creating
65 pilot projects that will strengthen linkages in the health care system and reduce barriers children face in
66 accessing comprehensive health care.

67 C. Goals. The county hereby adopts the following goals for the CHI:

68 1. Advocacy goals:

69 a. Ensure that the state fulfills its adopted goal to extend health care insurance coverage to all
70 children by 2010; and

Appendix A

Motion 12507

b. Ensure that the state fulfills its goals to connect children to a medical home and assure that high-quality, cost-effective care is provided;

2. Outreach goals. The county will:

a. Improve insurance access by increasing the number of insured children by identifying and enrolling eligible children in public insurance programs.

b. Improve health knowledge by training parents and staff at community agencies to identify children's health problems and encourage families to seek preventive care;

c. Improve access to health care by connecting children to regular sources of medical and dental care; and

d. Improve health status by ensuring that children receive appropriate evidence-based preventive health care services; and

3. Health innovation pilot projects goals:

a. Ensure that children receive appropriately integrated services for the mouth, the mind and the body by strengthening linkages in the health care system;

b. Reduce barriers children face in accessing health care services by developing systems that assure children receive timely coordinated preventive care; and

c. Leverage current opportunities to build evidence for future state-funded efforts by demonstrating innovative approaches and measuring effectiveness with carefully designed and implemented evaluations.

D. Resources. The county shall dedicate the following resources to achieve the goals of the CHI:

1. Advocacy resources. The county will continue to maintain the appropriate resources to develop, advocate for and respond to state policies affecting the health of children;

2. Outreach resources. The county intends to dedicate the following resources to the outreach component of the CHI:

Appendix A

Motion 12507

95 a. One million dollars annually from the county general fund in 2007, 2008 and 2009. The
96 executive shall reserve these funds in the county's general fund financial plan until such a time as they are
97 appropriated. Thereafter, the county shall evaluate whether there is continued need for county funds to
98 support the outreach goals of the CHI;

99 b. Four outreach teams comprised of contracted community health workers, health educators,
100 application workers and contracted care coordinators. The outreach teams shall be located in those
101 geographic areas that contain the highest number of uninsured and low-income children, currently identified
102 as:

103 (1) East King County;

104 (2) Seattle, White Center and North King County;

105 (3) South King County – Des Moines to Renton; and

106 (4) South King County – Federal Way, Kent and Auburn;

107 c. The county will continue to maintain the existing resources to support management and
108 evaluation of the outreach component; and

109 d. Should the county receive additional funding from the state to conduct outreach, the county
110 may choose to apply those funds to current outreach efforts, thereby reducing the county contribution of
111 one million dollars annually, or may choose to use state funds to augment the county's outreach effort; and

112 3. Health innovation pilot projects resources. With the exception of staff support that is primarily
113 dedicated to managing the other components of the CHI or other existing county functions, the health
114 innovation pilot projects component shall be funded solely with funds donated to the county and not with
115 county general fund resources.

116 E. Governance and Management. The county hereby adopts the following governance and
117 management structure for the CHI:

Appendix A

Motion 12507

118 1. Any changes or additions to policies for the CHI shall be established and adopted by the
119 Metropolitan King County Council.

120 2. An outreach implementation committee comprised of experts in King County representing
121 participating community-based organizations and their communities shall provide oversight to the
122 implementation of the outreach component of the CHI. The committee shall adopt a charter that shall
123 describe committee roles and responsibilities; membership; reporting structure; meeting frequency;
124 deliverables; and the manner in which recommended changes or additions to policies resulting from the
125 committee's oversight of the implementation of the CHI shall be proposed to the council; and

126 3. A health innovation implementation committee comprised of private sector donors, child health
127 experts, health care system and public health representatives shall design and provide oversight to the
128 implementation of pilot projects to support the mission, vision and goals of the CHI and that adhere to the
129 policies in subsection G. of this motion. The committee shall adopt a charter that shall describe committee
130 roles and responsibilities; membership; reporting structure; meeting frequency; deliverables; and the manner
131 in which recommended changes or additions to policies resulting from the committee's oversight of the
132 implementation of the CHI shall be proposed to the council.

133 F. Measurement and Evaluation.

134 1. The county hereby adopts the measurement and evaluation plan, Attachment A to this motion,
135 for the outreach component of the CHI.

136 2. The executive shall develop a measurement and evaluation plan(s) for the health innovation
137 component and related pilot projects of the CHI. In accordance with subsections D and G of this motion,
138 development of these plans shall be supported by funds donated to the county.

139 3. The executive shall develop semiannual and annual measurement and evaluation reports based
140 on the measurement and evaluation plans referenced in this section to report to the implementation
141 committees and the council on progress in meeting the CHI vision, mission, and goals. The executive shall

Appendix A

Motion 12507

transmit these reports to the implementation committees semiannually and to the council annually by August 15 of each year. The reports shall include key performance measures, targets, baseline data and benchmarks. The annual report to the council shall also include: (1) the implementation committee charters; (2) updated measurement and evaluation plans for the outreach component of the CHI, to include objective and performance measure targets for years two and three of the program; (3) measurement and evaluation plans for the health innovation pilot projects component, to be updated annually; (4) a summary of related activities being undertaken or funded by the state; and (5) recommendations on changes to the CHI based on the measurement and evaluation data or changes in state activities. Twelve copies of the annual report to the council shall be filed with the clerk of the council, for distribution to all councilmembers and to the lead staffs for the board of health and the law, justice and human services committee or their successors.

G. The county hereby adopts the following policies governing the health innovation pilot projects component of the CHI:

1. As county contributions are necessarily limited to the levels set forth in this motion, the county encourages public and private sector organizations to donate funds to supplement the county's contribution to this initiative. In accordance with K.C.C. chapter 2.80, the council shall accept such donations by motion and, recognizing the particular importance of such donations, shall appropriate the funds by ordinance before their expenditure;

2. Health innovation pilot projects shall be designed such that donated funds are assured to complete each project;

3. Health innovation pilot projects shall be designed to coordinate and support state and county efforts to increase children's access to preventive medical and dental care;

4. Health innovation pilot projects shall include defined goals, objectives and measurement and evaluation plans in order to develop an evidence base for future interventions by the state;

Appendix A

Motion 12507

166 5. Health innovation pilot projects shall be consistent with the adopted Policy Framework for the
167 Health of the Public; and

168 6. In requesting appropriation of funds donated to the county for health innovation pilot projects,
169 the executive shall transmit to the council information that demonstrates the projects adhere to the policies
170 adopted by this motion.

171 H. The council hereby finds that the CHI as defined in this motion is consistent with the adopted
172 Policy Framework for the Health of the Public. The council recognizes that children's health is affected by
173 many factors not directly related to health care. The council supports the development of strategies through
174 the public health operational master plan process that will further our communities' ability to protect,
175 promote, and provide for children's health.
